SHARP
Be Original.

The Intelligent Business Requires Intelligent Solutions

Efficiency. Productivity. Security. Sharp's SPOS Cloud reporting solution transforms the way we think about the future.

SPOS Cloud from Sharp is an extremely easy to use sales reporting system that gives hospitality and retail owners up to date, accurate real-time sales data from their Sharp EPOS terminal allowing for precise decision making to be made.

SPOS Cloud is completely versatile, the structure and flexibility of the software ensures that the solution is suitable for retail or hospitality businesses of any size – whether it is a single location or a multi-site operation, it requires zero maintenance.

The solution also works seamlessly with Sharp POS software, meaning it is an easy to deploy software and is an indispensable business tool for every retail and hospitality business.

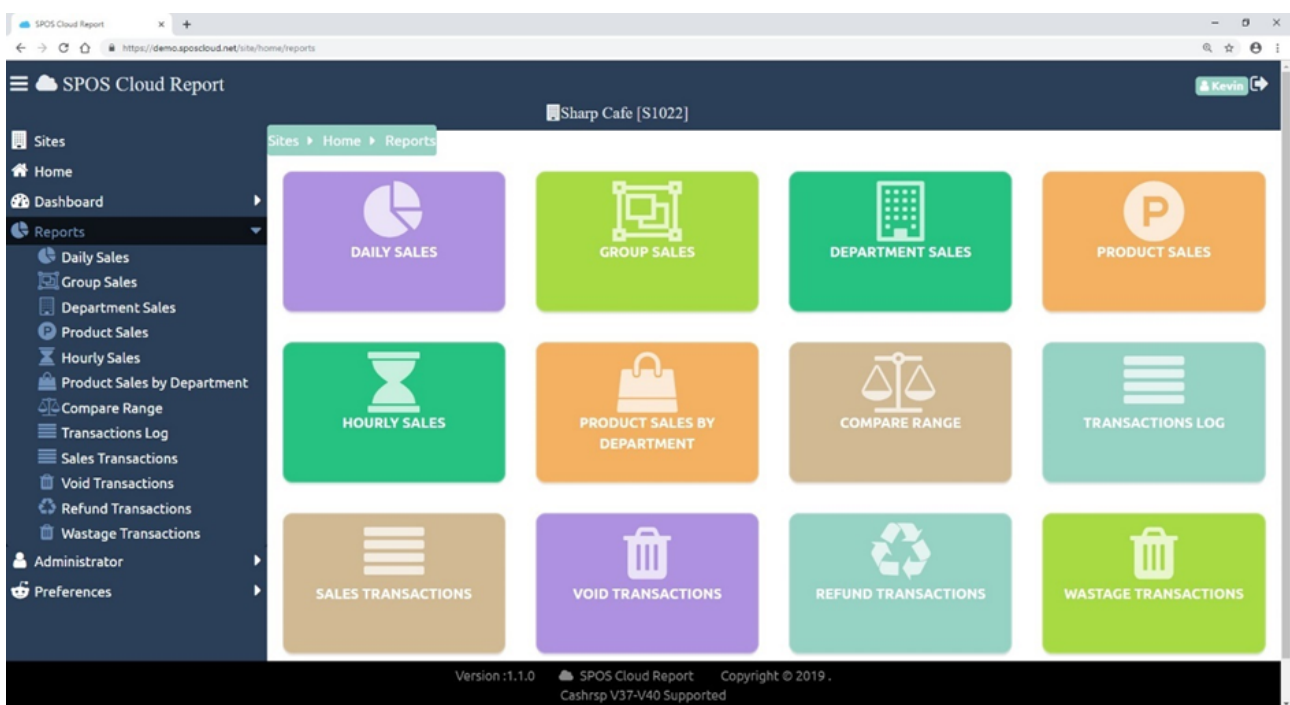

Save Costs

Another benefit to SPOS Cloud is that due to it being completely Cloud based - hosted within a Microsoft® Azure cloud environment - no costly IT infrastructure is required. The software also uses robust SSL certification and HTTPS security protocols. All that is required is an unfiltered internet connection. The database structure has been optimised for quality and speed of reporting, even when viewing a large volume of historical data.

Giving you all the information you need to achieve

Informative and flexible, making everyday reporting and auditing much easier.

Feature Rich and Easy to Use

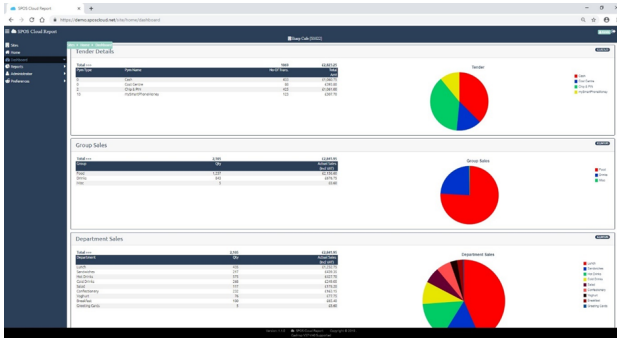

While the SPOS Cloud is feature rich with 12 fully detailed report categories, it's been developed for ease of use with the operator in mind. Information can be accessed anytime and anywhere via any internet connected smartphone, tablet or computer to guarantee that you're always up to date with your business' progress. The SPOS Dashboard delivers data at a glance, giving you an instant snapshot of staff key performance indicators, making it vastly simpler to highlight where they can progress.

Accurate Auditing

Encountering audit difficulties? The innovative Cloud-based software can seamlessly supply you with a full transaction log filtered according to staff member, till number, location or table number. You choose. Fraud safeguarding and management investigation is made infinitely easier when all negative transactions are clearly emboldened, highlighted and flagged. That way, you can retain staff performance records and provide guidance if and when it's needed, whether that be in upselling, customer service or just simple till training.

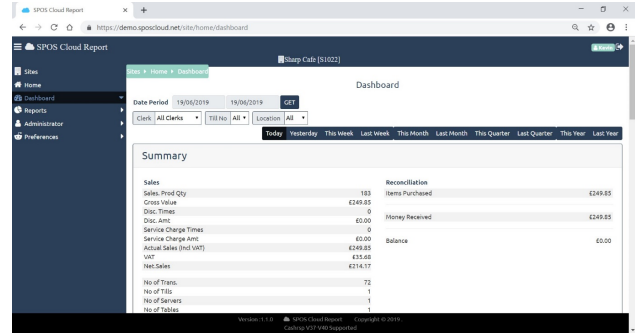

But most importantly, The SPOS Cloud system is here to help you understand your business.

Key Features

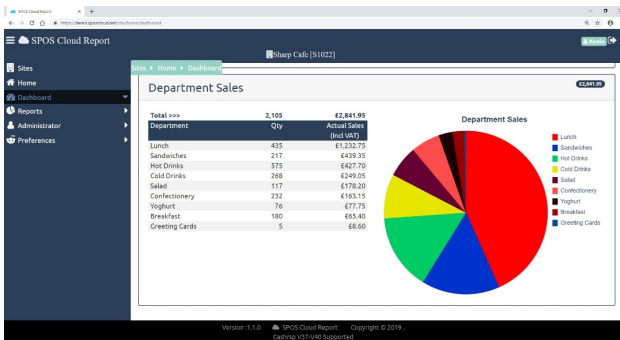

Data at a Glance

- The intuitive dashboard allows users to see an instant snapshot of key performance indicators.

Access Recent Data

- Quick access tabs allow for data to be sorted in many ways, such as:
 - Today / Yesterday
 - This week / last week
 - This month / last month
 - This Quarter / last quarter
 - This year / last year

View Department Sales

- All data can be viewed by department, allowing managers to make sure departments have optimum staff.
- SPoS Cloud gives an easy to view graphical overview and offers the choice of a bar or pie chart to suit individual preferences.

Discount Details			
Total >>>		10	-£104.90
Promo	Description	No of Times	Disc. / Item
ITEM	3 Beers for £9	6	-£36.70
ITEM	Hot Drink & Sandwich	3	-£3.60
ITEM		1	-£2.60

Track Promotions

- Mix and Match reporting clearly shows which promotions have been successful so that ineffective promotions can be either discontinued or made more attractive.
