SPOS Remote

Service made simple, with convenience and customer experience centreplace.

With the ability to use any mobile device running Android® 7.1.2 or higher, Sharp Remote maintains familiarity while delivering true ease-of-use for staff. The graphical, flexible User Interface (UI) makes it distinctly straightforward to follow an otherwise complicated array of food, drink and promotional options.

Seamlessly integrated with SharpPOS®, SPOS Remote replicates the existing Point of Sale programming, saving you valuable time training your staff on a unfamiliar new system.

Intuitive Solutions

Bill printing and tab finalisation straight from SPOS Remote, along with faster service through the recognisable SharpPOS® Active Table screen keeps customers satisfied while improving turnaround time.

SPOS Remote: Minimum System Requirements
- Mobile Device running Android 7.1.2 or greater
- SharpPOS V4.2.1094
- SPOS Remote must be installed to a machine with the following min specs: Windows 10 Enterprise; 4GB RAM min; 1GB min of available SSD/HDD space

On-site Infrastructure: Minimum Requirements
- WiFi on Android device must be on the same network as the SharpPOS system
- A site survey must be conducted to ensure sufficient Wifi coverage throughout the whole area where SPOS Remote will be used
- If the customer site is offering free WiFi for customer use, we recommend that this is Network is not to be used
